Trojanstone concrete sleepers are available in 3 original textures and many colours. All are manufactured using high strength concrete (35mpa) and reinforced with steel for increased structural strength. Trojanstone sleepers are easy to install using steel posts. A combination of 'H' section and channel can be used to erect any wall. Angled corner posts internal & external are also available. Sleepers can be cut to any length to complete your wall. Engineering specifications are available from your supplier of Trojanstone retaining wall systems.

Specifications

Dimensions - 1800 x *200 x 60

Weight - Approx 50 Kg each.

Qty per pallet - 30.

*Size is dependant on the selected texture.
